Guide for Active Property Management

Surveyor's Initials: AB
1/19/10

Parcel characteristics (description of and habitats on, i.e. fresh water wetlands, beech tree forest, etc.):

Freshwater wetlands.

Rare and/or endangered species:

Property characteristics that will be lost if no active management occurs (Estimate timeframe or rapidity that the active management must begin):

Rapid active management is not necessary.

Rate at which the invasive species may migrate onto adjoining lands:

Invasives seem to be limited to road edges and clearing edges. Virtually no invasives exist on the interiors of these properties, and don't seem to be spreading.

Is the parcel salvageable (weigh our resources against potential gains)?

Reopening the dirt road may be helpful to clear out some invasives but it may also invite more invasive growth.
