

TOWN OF EAST HAMPTON COMMUNITY PRESERVATION FUND

2020 Management and Stewardship Plan

Department of Land Acquisition and Management

Adopted, Resolution # 2020-288 (Revised 09/10/20)

The Community Preservation Fund Law was enacted to help protect and preserve our community character through the acquisition of interests or rights in real property within the Town and Villages. With regard to this law, community character shall involve one or more of the following: (a) establishment of parks, nature preserves, or recreation areas; (b) preservation of open space, including agricultural lands; (c) preservation of lands of exceptional scenic value; (d) preservation of fresh and saltwater marshes or other wetlands; (e) preservation of aquifer recharge areas; (f) preservation of undeveloped beach lands or shoreline; (g) establishment of wildlife refuges for the purpose of maintaining native animal species diversity, including the protection of habitat essential to the recovery of rare, threatened or endangered species; (h) preservation of pine barrens consisting of such biota as pitch pine, and scrub oak; (i) preservation of unique or threatened ecological areas; (j) preservation of rivers and river areas in a natural, free-flowing condition; (k) preservation of forested land; (l) preservation of public access to lands for public use including stream rights and waterways; (m) preservation of historic places and properties listed on the New York state register of historic places and/or protected under a municipal historic preservation ordinance or law; and (n) undertaking any of the aforementioned in furtherance of the establishment of a greenbelt.

Introduction

In an effort to create greater efficiency, transparency and accountability, the Peconic Bay Region Community Preservation Fund (CPF) law has been amended to institute a series of fiscal oversight measures, ensuring that this successful program continues to meet its objectives. The whole of this document will constitute a Management and Stewardship (M&S) Plan. This Plan will deal with the management and stewardship of property acquired using Community Preservation Funds as they relate to proposed expenditures for calendar year 2020.

Up to 10% of CPF revenue can be used for M&S purposes. With input from the Town Board, the Department of Land Acquisition and Management, the Town Attorney's office, the CPF Advisory Board, and the general public, this document will act as a manual to help guide the use of allotted monies for the specified properties and tasks discussed below. For the calendar year 2020, our M&S Plan budget is \$504,031 which represents approximately 2% (based upon \$25,000,000) of the expected revenues for 2020.

By resolution 2011-317, the Town Board adopted Rules and Regulations for CPF Acquisition and Stewardship:

WHEREAS, a Community Preservation Fund (CPF) Task Force was created by New York State Assemblyman Fred Thiele and State Senator Ken LaValle in 2010 to improve administration of the Community Preservation Fund; and

WHEREAS, the Task Force made a final report, and presented the report to the East End Supervisors and Mayors Association in December 2010, which included the establishment of rules and regulations to govern CPF acquisition and stewardship; and

WHEREAS, the Town Board has reviewed the proposed CPF Acquisition and Stewardship Rules and Regulations and finds that they add transparency, consistency and protection to the integrity of the CPF process;

NOW THEREFORE, BE IT RESOLVED, that the Town Board of the Town of East Hampton hereby adopts the Community Preservation Fund Acquisition and Stewardship Rules and Regulations.

These Rules and Regulations (attached as schedule A) encompass the CPF law as it pertains to Management and Stewardship, as well as defining appropriate expenses and/or projects eligible for CPF M&S funding.

CPF REVENUE BY YEAR

(Includes 2% Transfer Tax receipts, interest, co-op sales, donations and rental agreements)

November 30, 2019
*Subject to Audit

Overview

The Community Preservation Fund (Peconic Bay Region 2% Transfer Tax, 64-e) was adopted in 1998 by a voter approved referendum, and began collecting revenue in 1999 for the specific purpose of preserving the Community Character on the East End of Long Island. In an ongoing effort to preserve our rural character, protect our native flora and fauna, safeguard our vulnerable groundwater supply, protect our surface waters and preserve our remaining farmland, the Town and incorporated Villages have been acquiring these assets through the purchase of fee title, the purchase of easements, the purchase of development rights, the acceptance of gifts, or a combination thereof.

To date, the Town of East Hampton has acquired interests or rights in real property amounting to 439 parcels (some parcel tax map numbers may be combined post acquisition) and there are an additional 20 parcels in contract, which encompasses approximately 2292 acres. The CPF has generated approximately \$440,712,193 (please see chart above).

The 459 parcels (closed and in contract combined) will be broken down into six main categories found within the M&S Plan, and simplified here as:

- Category 1: Historic Lands and Buildings
- Category 2: Parks and Recreation Properties
- Category 3: Open Space and Forestlands
- Category 4: Wetlands
- Category 5: Beaches and Shoreline
- Category 6: Farmland
- Category 7: Water Quality

Management and Stewardship for all parcels will be consistent with the resolutions that were passed to initiate these acquisitions. For example, if the purpose of acquisition is historic preservation, the M&S will consist of those steps necessary to further that purpose. However, M&S is not a static process, and therefore this M&S Plan is subject to modification as circumstances change due to new discoveries (e.g. encroachments or debris), on-site condition changes and the addition of properties to our roster of protected lands. Section 6 of the CPF Law allows for modification of this M&S Plan subject to public hearing and passage of amending resolutions.

Three primary goals for acquired properties are the creation of a baseline document, the creation of a management plan for each property or group of similar properties in similar geographic areas and regular monitoring of those properties.

Baseline Documentation

This is a process of collecting physical data for each property at the time of acquisition, or as soon thereafter as practicable. This data can be used as a protection of the Town's rights and or obligations to that particular property. This data will include but not be limited to:

1. Aerial photos
2. Location maps
3. Tax Map
4. Full set of photo documentation taken along all boundaries of the property and other areas of interest
5. The parcel deed and recording documents
6. Title
7. Survey
8. Notes describing the physical condition of the property
9. Invasive species assessment

The completed baseline becomes an invaluable tool for consistency in monitoring a given property for encroachment, poaching of shrubbery, proper signage, proliferation of invasives, etc. It provides a clear history of any significant change from the time of acquisition.

Management Plan

A management plan is a guide that includes a number of elements including but not limited to:

1. Existing and proposed uses
2. Specific management actions (clearing, mowing, meadow restoration, etc.)
3. Time frame for actions
4. Appropriate signage
5. Trail creation or closure
6. Access (e.g. parking area, trail locations)
7. Maintenance responsibilities
8. Restrictions

This information is compiled and presented in a straightforward, easy to follow and user friendly document. Since people are an integral part of any ecosystem and our activities often dominate all other impacts, the management plan may also help define future site uses including peripheral parking areas, kiosks, trail location and maintenance, or more active uses such as sports fields. Essentially, the document needs to set the expectations and give specific direction to the future stewards of the property. This plan would need to be adopted by the Town Board post Public Hearing.

Monitor Property

Annual or as needed physical inspections and reports on all properties will be completed. Ongoing monitoring of a property is imperative in order to protect this community asset. Monitoring will be done to document invasive species, poaching of trees and shrubs, dumping, and encroachments by neighboring land owners. The Town is responsible for protecting Community Character, which includes protecting preserved properties for the benefit and appropriate use by all in the community.

Proposed Expenses as they Relate to M&S

The adopted budget below details expenses as they relate to salaries, office expenses, subcontract costs, and other departmental maximum spending limits. Proposed expenditures are governed by Section 13 of the CPF law:

The cost of employees and independent contractors to implement the provision of this section, may only be paid for by the fund where the duties and responsibilities of said employees and independent contractors are directly dedicated to implementing the provisions of this section. Where such employees and independent contractors are not exclusively dedicated to implementing the provisions of this section, no more than the cost of the actual time expended directly dedicated to implementing the provision of this section may be charged. Such costs shall be expressly identified in the town budget and any plan adopted pursuant to this section before funds for such costs may be expended. In addition, such costs must be documented by a time accounting system, subject to audit.

Account	2020	2020 Adopted Budget
CA 8801	CPF STEWARDSHIP	
CA 8801 51100	Full Time Salaries	\$136,737
CA 8801 51103	Longevity	\$4,000

CA 8801 51990	Contingency	\$4,000
CA 8801 52300	Vehicles	\$35,000
CA 8801 52450	Computer Equipment	\$1,000
CA 8801 52600	Other Equipment	\$4,000
CA 8801 54100	Office Expense	\$800
CA 8801 54500	Subcontract Costs	\$200,000
CA 8801 54520	Outside Professional	\$14,000
CA 8801 54560	Motor Vehicle Repairs & Supply	\$1,000
CA 8801 54562	Fuel - Motor Vehicle	\$1,000
CA 8801 54600	Uniforms	\$500
CA 8801 54709	MTA Tax Due	\$521
CA 8801 54712	Re-Veg and Kiosk Materials	\$1,500
CA 8801 54731	Signs	\$400
CA 8801 54850	Small Tools & Equipment	\$1,200
CA 8801 54982	Tree Maintenance	\$4,000
CA 8801 59010	NYS Retirement	\$20,295
CA 8801 59030	Social Security & Medicare	\$11,718
CA 8801 59060	Health Insurance	\$46,854
CA 8801 59090	Dental/Optical Benefits	\$3,063
CA 8801	TOTAL- CPF STEWARDSHIP	\$504,031

Note 1. As opposed to doing a specific breakdown of each individual property, we have created separate tables for the six primary categories of properties. Each table is preceded by a brief description of the types of lands in said category, as well as the M&S goals and objectives. Properties are broken down by property groups because lands that are similarly classified generally have similar M&S requirements.

Note 2. Although the full stewardship budget is represented above, the six categories below will help identify any specific projects or expenditures associated with that property group. The “Project or Actions” represented tie specifically to a budgeted expense and associated budget lines. All “Project or Actions” and associated expenses are approved by the Town Board in advance of taking said actions.

Note 3. Some of the lands we have acquired are in partnership with New York State, the County of Suffolk, the incorporated Villages, Peconic Land Trust, the Nature Conservancy, or the Federal Government and where applicable there will be a notation in the land tables. While some of these partners may have required the lead agency status for management rights on a particular property, it does not relieve the Town’s, and therefore CPF’s, responsibility to help administer M&S which may include related expenses.

Historic Lands and Buildings Category 1

We have preserved nine historic properties in an effort to partially retain some of our heritage and historic character. Similar to East Hampton’s natural resources, our historic resources are vulnerable to development pressures as well as natural forces, and once lost are irreplaceable. The instruments of protection that can be used in order to preserve these properties, in conjunction with planning and zoning regulations, include but are not limited to gifting, purchase of fee title, and the purchase of a façade easement. We own the fee title of Duck Creek Farm, the Lester/Labrozzi property, Brooks-Park property and the Gardiner property in East Hampton Village. The remaining five are Façade Easements requiring no additional monetary outlay from the Town and include the Wainscott Conklin house & barn, the East Hampton Conklin house, the Stephen Sherrill house, Schellinger Farm and the Thomas Moran house in East Hampton Village. Properties purchased for historic purposes shall be listed on the Federal or State registry, and/or need to be locally designated.

Goals and Objectives

For fee acquisitions, we intend to restore the structures (as per Federal restoration guidelines) as necessary, in conjunction with an historic consultant. We will work with our local Historical Society and other organizations to learn the properties’ histories and former uses in an effort to support appropriate future uses. We will seek grants and other private funding sources to accomplish restoration work; however, CPF will likely be the primary funding source for proposed work. Once restored, we may work with the Historical Society to help facilitate use and management of the properties.

Eligible Project Parcels

Name	Physical Address	Tax Map Number	Acreage	Description of Property	Comments
Duck Creek Farm (Lang)	367 Three Mile Harbor Hog Creek Rd. Springs	59-2-17.1	6.69	Historic	Historic property owned in fee title
Labrozzi/Lester (Labrozzi, DiSunno, Barristers Group)	135 N Main St East Hampton	163-6-25, 26 & 31	2.88	Historic	Historic property owned in fee title
Gardiner	36 James Lane East Hampton Village	301-8-9-1.4	3.673	Historic & Agriculture	Historic property owned in fee title
Brooks - Park (Dodson & Lawrence formerly Cochran)	124, 126 & 128 Neck Path Springs	103-8-4, 5 & 6	10.976	Historic	Historic property owned in fee title
Guild Hall Thomas Moran House	29 Main St East Hampton Village	301-8-7-52	.70	Historic	Historic Preservation Easement

Kolasa & Tarquinio (Foster-Stephen Sherrill House)	2 Springs Fireplace Rd East Hampton	163-3-11.1	1.03	Historic	Façade Easement
WVB Partners Conklin House	57 Accabonac Rd East Hampton	187-3-17	.80	Historic	Historic Preservation Easement
Schellinger	145 & 137 Main St Amagansett	171-1-p/o 9 & p/o 3.1	3.135	Historic	Historic and Agricultural Easements
Conklin	200 Sayres Path & 143 Main St Wainscott	200-1-21.7 & 21.8	1.6	Farmland & Historic Easement	Agricultural Easement Historic Easement
Total Historic			31.484	Historic	

Note:

At the recommendation of our Property Management Committee, we are in the process of removing Brooks – Park from the current historic designation in favor of Open Space. This will include the removal of structures and the restoration of the land back to green space. We have received approval from the ARB and therefore we are proceeding with the solicitation of bids for demolition at this time.

Parks and Recreation Properties
Category 2

These parcels have been acquired for “establishment of parks, nature preserves, or recreation areas” which may include passive and/or active recreational uses. The majority of these parcels fall under the purview of this department’s Land Stewards; however, the parcels designated specifically as “Parks” have their day-to-day maintenance taken care of by our Parks and Building Maintenance Department. Routine maintenance such as mowing lawns, garbage removal or the installation of apparatus, etc. will not be chargeable to the Fund.

Goals and Objectives

There are many different types of park and/or recreational lands, and each have somewhat unique M&S requirements. Specific management plans will be completed as necessary for each of these properties as a guide for future M&S.

Eligible Project Parcels

Name	Physical Address	Tax Map Number	Acreage	Description of Property	Comments

Proposed Expenditures

Project or Action for Wainscott Green (Estate of Kaushik)	Estimated Cost	Budget Line
Sub Contract	\$64,635	CA 8801-54500

Description of Expenditures

A management plan for this property has been approved by the Town Board via resolution 2019-1105 which includes allowing for the addition of a small parking area and multi user trail. The Town has received estimates from our Highway Department and outside vendors of \$64,635 for the completion of this work.

Open Space and Forestlands

Category 3

Open Space is a broad category that may include, but not be limited to: lands of exceptional scenic value; wildlife refuges with significant biological diversity; unique or threatened ecological areas; aquifer recharge areas; trails; pine barrens and forestlands. In addition, Open Space also encompasses East Hampton’s woodland areas, which vary greatly in species composition and community structure from one region to the next. There are four woodland subcategories: pine barrens, oak/hickory forest, beech forest and white pine forest. East Hampton still retains large sections of its original diverse habitat, and as a result species which have been lost in other areas can still be found here. This makes East Hampton unique on Long Island and contributes greatly to its “sense of place”.

Goals and Objectives

Our goal is to preserve these properties’ species diversity, scenic vistas and groundwater resources. Because this category represents our largest acreage holdings, with such a wide variety of property and woodland types, there will be a broad range of M&S requirements. These needs may include, where appropriate, removal of invasive species and re-vegetation with native species to enhance and protect the ecology of these properties. Any such work will be undertaken based on an assessment of the seriousness of the ecological threat(s) posed by invasive species (or other threats) in particular locations, and of the feasibility and cost-effectiveness of projects designed to reduce the identified threat(s). As the Town completes the baseline documentation and management plans referenced above, they will be used to prioritize properties with the greatest need of ecological intervention which will be incorporated into a timeline for initiating remediation. In addition, our goals also include reasonable public access through trails and other means consistent with the ecological values of the properties. We must ensure safe and appropriate uses on these properties.

Note:

There are no current proposed actions or projects for this category of parcels, however, we will still work toward the creation of management plans, ongoing monitoring, installation of signage, maintenance of trails, etc., which are expenses already covered within the budget.

Wetlands
Category 4

These types of parcels are fresh and saltwater marshes or other wetlands, including harbors, bays, embayments, dreens, swamps, bogs and creeks. This will include harbor protection overlay districts, watershed lands and the nationally designated Peconic Estuary area. Wetlands are defined as areas that are saturated by groundwater or surface water either some or all of the time and support vegetation types indicative of wet or moist areas. These properties support a great diversity of fish, amphibian, avian and other wildlife. Wetlands protect and improve water quality and are especially sensitive lands.

Goals and Objectives

Due to the lands' fragile nature and ecological importance, we must protect these lands from development, dumping, littering, and inappropriate uses. Rising sea levels also pose a threat to our marshes and proper stewardship may necessitate monitoring these changes, as well as other indicators of marsh health.

Note:

There are no current proposed actions or projects for this category of parcels, however, we will still work toward the creation of management plans, ongoing monitoring, installation of signage, maintenance of trails, etc., which are expenses already covered within the budget.

Beaches and Shoreline

Category 5

These lands are a very important component of the Town's natural environment and support a large number of protected plant and animal species. In fact, nine of the sixteen New York State Significant Coastal Fish and Wildlife Habitats designated in East Hampton contain areas consisting of duneland and beach. These outstanding areas are important to many coastal wildlife species, including threatened and endangered species, and provide valuable opportunities for ecological research. The adverse human impacts on natural coastlines throughout Long Island and the entire East Coast greatly intensify the ecological importance of East Hampton's pristine beaches and dunes. Our Beaches and Shoreline category includes dunelands, bluffs, bay front, ocean front and lake front. Access for fishing, swimming, educational opportunities, sunbathing, etc. will be limited as appropriate based upon the sensitivity and or ecology of each parcel, which will be evaluated on a case by case basis.

Goals and Objectives

M&S must consider that the shoreline is a dynamic system subject to sea level rise, storm events, daily tidal changes, and other factors that constantly alter the configuration of beaches, bluffs and dunes. Because of the species diversity and ecologic sensitivity, we must create access points where appropriate, and prohibit access where not appropriate.

Note:

There are no current proposed actions or projects for this category of parcels, however, we will still work toward the creation of management plans, ongoing monitoring, installation of signage, maintenance of trails, etc. which are expenses already covered within the budget.

Farmland Category 6

The Town has protected Farmland through the purchase of development rights, easements, and/or the acquisition of fee title. This site type describes a particular human use of the land as well as a non-renewable resource: our prime agricultural soils. The protection of the Town's farm properties in sufficient number and acreage is vital to the preservation of Community Character and heritage. When acquired, these lands are restricted to an exclusive agricultural use as per the Purchase of Development Rights Deed, to protect and promote the business of farming.

Goals and Objectives

Through diligent monitoring and enforcement of the easements or license agreements we can ensure the protection of the soils which will allow current and future farmers the opportunity to continue this profession on the East End. Where appropriate, we will also protect the vistas offered by these protected lands.

Eligible Project Parcels

Name	Physical Address	Tax Map Number	Acreage	Description of Property	Comments
Babinski	39 Beach Ln Wainscott	200-3-38.5	19.70	Farmland	Joint purchase w/Peconic Land Trust (with contributions from, the Wainscott Farm Land Protection Fund) Development Rights

Note:

There are no current proposed actions or projects for this category of parcels, however, we will still work toward the creation of management plans, ongoing monitoring, installation of signage, maintenance of trails, etc. which are expenses already covered within the budget.

Water Quality Category 7

Purchasing private land is one of the most important tools used to protect a watershed and is a key strategy for watershed management. Acquisition of land for water quality improvement allows for additional protections and opportunities to remediate sensitive waterbodies designated in East Hampton. Property acquisition allows for permanent protection of hydrologically-sensitive lands for both shoreline parcels with short groundwater travel times and direct surface runoff potential or upland areas that serve as groundwater aquifer recharge areas. These sensitive lands serve a number of important water quality functions such as; maintaining or enhancing natural features that filter pollutants before they reach water resources; precluding land uses that would otherwise introduce new pollutants; and shifting development to less sensitive areas. Priority land acquisition for water quality improvement projects include shoreline parcels for the purposes of removing an existing source of pollutants and enhancing the property to control the introduction of contaminated overland runoff or groundwater seepage to a waterbody as well as purchase of upland parcels in high-density residential neighborhoods for siting aggregated community wastewater treatment.

Goals and Objectives

M&S must consider that the parcel is acquired for the sole purpose of either direct water quality improvement through the removal of known pollution sources or indirectly through the implementation of water quality improvement projects including; wastewater treatment, non-point source pollution abatement, aquatic habitat restoration, or pollution prevention.

Priority areas for projects include;

- Locations with drinking water wells (no public water)
- Sites that are located in the Harbor Protection Overlay District (HPOD)
- Sites near waterbodies listed as TMDL impaired or the site of restoration efforts
- Sites that have shallow depth to groundwater
- Sites that may be located in flood or storm surge zones
- Sites with porous or impervious soils which limit proper treatment of wastewater
- Areas where groundwater reaches surface water bodies quickly
- High Density Residential Areas

Eligible Project Parcels

Name	Physical Address	Tax Map Number	Acreage	Description of Property	Comments
Chiles	36 Gann Road, Springs	59-1-2	1.1	Water Quality	Purchased for Aquaculture and education center
Total Water Quality			1.1		

Proposed Expenditures

Project or Action Chiles	Estimated Cost	Budget Line
Sub Contract	TBD	

Note:

There are no current proposed actions or projects for this category of parcels, however, we will still work toward the creation of management plans, ongoing monitoring, installation of signage, maintenance of trails, etc. which are expenses already covered within the budget.

Staffing

Baseline documentation is up to date; therefore, only new acquisitions will require this service. A primary goal will be to work on several management plans related to specific properties, primarily parks/recreational lands, which enjoy a significant visitor base. This work will be in addition to the oversight and management of all projects in which other departments, sub-contractors or interns/volunteers are involved. In addition, we will monitor all properties for dumping, encroachments, site disturbances, etc. While all properties have varying expenditures related to them, most of the expenditures for M&S are generally staffing expenses. Due to staffing constraints, projects may involve other departments, outside contractors or using short-term interns from other organizations or schools. In order to assist in meeting the demands and obtain greater community involvement, we recently extended the “Adopt-a-Preserve” program which is volunteer based. These volunteers will assist our department with monitoring and some appropriate labor for approved projects such as clean-ups, trail maintenance, bird nesting projects, etc.

Conclusion

In an effort to create greater efficiency, transparency and accountability the Peconic Bay Region Community Preservation Fund law has been amended to institute a series of fiscal oversight measures to ensure that this successful program continues to meet its objectives. The responsibility of this Department is to create a document that will guide us in our efforts toward appropriate M&S goals and objectives, assist in prioritizing projects, and control related expenditures. In addition to transparency, the process gives the general public the opportunity to participate in the discussion surrounding proposed expenditures. As outlined above, M&S is not a static process; therefore, this M&S Plan is subject to modification as circumstances change due to storm or weather-related issues, on-site condition changes and the acquisition of additional properties added to our roster of protected lands. Section 6 of the CPF Law allows for modifications of this M&S Plan, subject to public hearing and passage of amending resolutions.

Up to 10% of CPF revenue can be used for M&S purposes. With input from the Town Board, the Department of Land Acquisition and Management, the Town Attorney’s office, the CPF Advisory Board, and the general public, this document will act as a manual to help guide the use of allotted monies for the specified properties and tasks discussed above. For the calendar year 2020, our M&S Plan budget is \$504,031 which represents approximately 2% (based upon \$25,000,000) of the expected revenues for 2020.

Schedule A

RULES AND REGULATIONS FOR CPF ACQUISITION AND STEWARDSHIP

Community Preservation Fund

The purpose of Rules and Regulations for Acquisition and Stewardship Implementation is to standardize the application of the Community Preservation Fund state statute, Town Law 64-e. The intent is not to create new law but to ensure that the controlling law is applied evenly for all East End Towns primarily through a series of examples demonstrating the proper, as well as the improper, administration of Community Preservation Fund acquisition and stewardship programs.

**ADOPTED BY THE TOWN BOARD OF THE TOWN OF
EAST HAMPTON ON APRIL 7, 2011**

3.(d) The purposes of the fund shall be exclusively, (d) to provide a management and stewardship program for such interests and rights consistent with subdivisions nine and nine-a of this section and in accordance with such plans designed to preserve community character, provided that not more than ten percent of the fund shall be utilized for the management and stewardship program...

The ten percent of the fund limitation for management and stewardship costs relates to the annual fund revenues. The last full calendar year of known revenue shall be used to determine the maximum amount permitted to be expensed for management and stewardship programs.

Example: In preparation of its 2010 budget in late 2009, a Peconic Bay Region Town would look to the complete CPF revenues received in 2008 to determine 10% of the fund for the 2010 budget and for compliance with this section of the statute.

3-a. Preliminary and incidental costs in connection with the acquisition of interests or rights in real property, pursuant to subdivision three of this section, shall be deemed part of the cost of the acquisition for which they were incurred. Such expenditures may include any administrative or other expenditures directly arising therefrom. No expenditure shall be charged to the fund, unless authorized by law. A full accounting of such costs for each acquisition of land shall be provided to the Town Board.

Examples of appropriate costs associated with the acquisition of interests or rights in real property include, but are not limited to:

Example: Structural inspections, engineering inspections, environmental inspections, environmental assessments

Example: Survey maps, property flagging, installation of property Monuments

Example: Topographical or other maps

Example: Title searches

Example: Natural resource inventories

Example: Soil sampling

Example: Storage tank testing

Example: Professional services retained exclusively on behalf of the municipality to effectuate the acquisition of the real property

Example: Real estate taxes due and owing from the date of acquisition

4. Preservation of community character shall involve one or more of the following: (a) establishment of parks, nature preserves or recreational areas; (b) preservation of open space, including agricultural lands; (c) preservation of lands of exceptional scenic value; (d) preservation of fresh and saltwater marshes or other wetlands; (e) preservation of aquifer recharge areas; (f) preservation of undeveloped beachlands or shoreline; (g) establishment of wildlife refuges for the purpose of maintaining native animal species diversity, including the protection of habitat essential to the recovery of rare, threatened or endangered species; (h) preservation of pine barrens consisting of such biota as pitch pine and scrub oak; (i) preservation of unique or threatened ecological areas; (j) preservation of rivers and river areas in a natural, free-flowing condition; (k) preservation of forested land; (l) preservation of public access to lands for public use, including stream rights and waterways; (m) preservation of historic places and properties listed on the New York State register of historic places and/or protected under a municipal historic preservation ordinance or law; and (n) undertaking any of the aforementioned in furtherance of the establishment of a greenbelt.

The establishment of parks or recreational areas described in (a) above shall include outdoor active or passive recreation, as long as the recreational use is appropriate, permissible and not inconsistent with the purpose for which the property was acquired.

Any physical improvements to the property for active recreation including, but not limited to, an aquatic facility, sports fields, manicured park areas, fitness trails, restrooms and playgrounds, cannot be expensed to the CPF. Such capital projects are appropriate for a Town's general fund, capital bonding program, park district or other funding source.

Section 9(c) addresses allowable expenses to enhance access for passive use of open space.

The preservation of cultural resources, such as community theaters, community centers, art galleries, museums, bowling alleys and movie theaters, is not included as a legitimate "preservation of community character" as defined by this statute.

In order to be eligible for CPF, real property must meet one of the 13 community character criteria set forth above. Land which preserves what could be considered "community character" in general is not sufficient to be eligible for CPF acquisition.

6. The Town Board of any town in the Peconic Bay region which has established a Community Preservation Fund shall, by local law, adopt a Community Preservation Project Plan. This plan shall list every project which the Town plans to undertake pursuant to the Community Preservation Fund. It shall include every parcel which is necessary to be acquired in the Town in order to protect community character. Such plan shall provide for a detailed evaluation of all available land use alternatives to protect community character, including but not limited to: (a) fee simple acquisition; (b) zoning regulations, including density reductions, cluster development and site plan and design requirements; (c) transfer of development rights; (d) the purchase of development rights; and (e) scenic and conservation easements. Said evaluation shall be as specific as practicable as to each parcel selected for inclusion in the plan. The plan shall establish the priorities for preservation and shall include the preservation of farmland as its highest priority. Funds from the Community Preservation Fund may only be expended for projects which have been included in said plan. Said plan shall be updated not less than once every five years, but in no event until at least three years after the adoption of the original plan. A copy of the plan shall be filed with the Commissioner of Environmental Conservation, the Commissioner of Agriculture and Markets and the Commissioner of the Office of Parks, Recreation and Historic Preservation. Said plan shall be completed at least sixty days before the submission of the mandatory referendum required by Section 1449-bb of the tax law. As part of, or in addition, to said Community Preservation Fund Project Plan, each Town Board may also adopt a Management and Stewardship Plan for interests or rights in real property acquired pursuant to this section. No monies from the fund shall be expended for management and stewardship, except as approved in said plan. Said plan may provide management and stewardship projects for up to a three year period and shall provide a description and estimated cost for each project. Said plan shall be approved and adopted by local law and may be updated from time to time at the discretion of the Town Board. Only

management and stewardship projects permitted pursuant to Subdivision 9a of this section shall be eligible to be included in the plan.

1. A property must be included in the CPF Project Plan in order to be acquired with CPF monies. A property may be added to the Project Plan at any time subsequent to, and only after a public hearing on the matter. The public hearing must contain the rationale for including the parcel in the Project Plan and must identify the particular category of the preservation of community character set forth in Section 4. Amendments to the Project Plan shall be forwarded to those individuals listed in section 6.
2. New land acquisitions must be added to the Management and Stewardship Plan after a public hearing on the matter and before monies from the fund are expended for stewardship and management of the land. This public hearing may be combined with the public hearing to acquire the property. The public hearing on the matter and inclusion in the Management and Stewardship Plan may occur at any time subsequent to acquisition of the land. If it can be determined at the time of inclusion, the source of funding for a stewardship project should be provided at the public hearing

9. Land acquired pursuant to this section shall be administered and managed in a manner which: (a) allows public use and enjoyment in a manner compatible with the natural, scenic, historic and open space character of such lands; (b) preserves the native biological diversity of such lands; (c) with regard to open spaces, limits improvements to enhancing access for passive use of such lands such as nature trails, boardwalks, bicycle paths, and peripheral parking areas provided that such improvements do not degrade the ecological value of the land or threaten essential wildlife habitat; and (d) preserves cultural property consistent with accepted standards for historic preservation. In furthering the purposes of this section, the Town may enter into agreements with corporations organized under the not-for-profit corporation law and engage in land trust activities to manage lands including less than fee interests acquired pursuant to the provisions of this section, provided that any such agreement shall contain a provision that such corporation shall keep the lands accessible to the public unless such corporation shall demonstrate to the satisfaction of the Town that public accessibility would be detrimental to the lands or any natural resources associated therewith.

The public use of a CPF parcel must be compatible with the specific purpose for which the land was acquired as set forth in the definitions of "community character" in section 4 herein and in a manner which meets the criteria above. Improvements to open spaces must be to enhance access for passive use.

Example: In reference to 9(c) above, a peripheral parking area does not include an entire parcel acquired with CPF monies to be improved entirely as a parking area unless the entire parcel is a single and separate tax map parcel which is adjacent to a larger tract of CPF land and functions as the peripheral parking area for the abutting preserved land and is considered merged with the larger protected parcel.

In reference to 9(d) above, preserving "cultural property consistent with accepted standards for historic preservation" is intended to include only historic properties and places, specifically, historic archeological properties and places. The preservation of "cultural property," other than historic, is not permitted by the statute.

For purposes of this section, most properties acquired with CPF monies must be available for public access and enjoyment compatible with the property's characteristics. Public access may be denied if it can be demonstrated that public access could harm the property or its natural resources. Public access for lands encumbered with a conservation easement or agricultural development rights deed is not permitted unless specifically stated in the easement or deed.

Example: A wetlands parcel inundated with tidal wetlands is likely not an appropriate site for public pedestrian access.

Public access may also be denied if the Town determines that public access could threaten the health, safety and welfare of the public.

Example: An unsafe building or land condition may be fenced or otherwise have access prohibited to protect public safety.

Example: Access may be controlled by a physical barrier to prevent dumping and littering.

Example: Motorized access may be prevented due to the environmental sensitivity of the land

9-a. (a) Except for interests or rights in real property acquired for historic preservation purposes, management and stewardship projects shall be only expended for (1) projects which promote the protection or enhancement of the natural, scenic and open space character for which the interests or rights in real property were acquired, or (2) accessory uses related to the purpose for which the interests or rights in real property were acquired consistent with subdivision 9 of this section, or (3) restoration of acquired real property to its natural state, including the demolition of existing buildings and structures.

- (1) Management costs for CPF properties must relate to the stated statutory purpose of the parcel acquisition.

Example: for a parcel acquired to protect wetlands, CPF monies cannot be expended to clear native vegetation of the property unless the removal is part of a restoration plan.

Example: Historic properties acquired in fee title cannot be used for other government functions or to house other governmental departments or staff other than for Community Preservation Fund purposes.

Example: The cost of creation of an access road and peripheral parking area for a CPF parcel is an appropriate CPF management cost.

Example: The cost to manufacture signs for installation on CPF land is an appropriate cost.

Example: The purchase of fencing and gates is an appropriate cost.

Example: The cost for initial debris removal is an appropriate cost.

Example: Land clearing that facilitates the purposes delineated in Section 9 herein. For example, the clearing of invasive plant species and the re-grading of land in order to re-establish tidal wetlands is an appropriate cost, but the clearing and re-grading of land for the purposes of active recreational improvements, is prohibited.

Example: Costs associated with the removal of invasive plant species is an appropriate cost.

Example: The purchase and installation of native plant and shrubs as part of a restoration plan to establish a natural vegetative buffer adjacent to wetlands is an appropriate cost but the purchase and installation of native plant and shrubs to beautify an improved park area is prohibited.

The term "projects" set forth in 9-a(a)(1) above, shall include equipment (including vehicles and other motorized items), tools, supplies and staff necessary to accomplish the management and stewardship purpose for particular properties.

Any equipment, tools or supplies acquired with the Fund must be used exclusively for CPF stewardship and management.

Except for historic preservation properties, the improvement, repair, reconstruction or adaptive construction of buildings upon the CPF land shall not be expensed to the Fund.

9-a. (b) In the case of interest or rights in real property acquired for historic preservation purposes, funds may be expended only for the restoration and rehabilitation of buildings and structures consistent with accepted standards for historic preservation.

The New York State Office of Parks, Recreation and Historic Preservation has determined that projects are evaluated using the Secretary of the Interiors Standards for the Treatment of Historic Properties. These standards in conjunction with the Secretary of Interior's Standards for Rehabilitation (applicable to the federal tax credit program) are the accepted guidelines for historic preservation of CPF properties. (See Appendix)

Example: For a CPF property listed on the National Registry, State Registry or locally designated as historic, permissible CPF stewardship costs include matching funds for a restoration grant, cost of materials and labor, architectural and planning consultants and reports.

Example: Restoration and renovation of historic buildings shall not include the installation or maintenance of historic landscaping plants, hardscaping or the re-creation of the grounds at the time of historic significance.

Permissible CPF stewardship costs do not include costs associated with the modernization or adaptive re-use of historic structures.

Example: The following expenses incurred for an historic structure or property can be expensed to the CPF if they are part of the rehabilitation or restoration of the historic features of the historic property:

Group A (permissible from CPF)

- Roof repair or replacement;
- Repair or replace exterior siding;
- Foundation repair;
- Flooring repair or replacement;
- Plaster/sheetrock repair or replacement;
- Window/doors repair or replacement;
- Framing work, sills, soffits, fascia, corner boards, trim, moldings;
- Historic consultant, architect, engineer costs;
- Repair of driveway and parking area existing at time of acquisition;
- Mandatory ADA-compliant structural modifications

Example: The following expenses incurred for an historic structure or property can be expensed to the CPF at a rate equal to the total preservation cost multiplied by not more than 20%:

Group B (partially permissible from CPF)

- Central air conditioning or heating components
- Chimneys (existing)
- Electrical wiring and lighting fixtures
- Elevators
- Escalators
- Fire escapes
- Plumbing and plumbing fixtures
- Sprinkler systems

Total project costs will be derived from adding Group A and Group B expenses. Total project costs multiplied by no more than 20% is the amount of Group B expenses that may be expensed to CPF. Any amount beyond 20% must be paid from a funding source other than CPF. For example: Total Group A expenses = \$100,000 and Total Group B expenses = \$100,000 for a Total Project Cost = \$200,000. $20\% \times \$200,000 = \$40,000$. Therefore \$140,000 may be expensed to CPF and \$60,000 of Group B costs must be expensed to a fund other than CPF.

Example: The following expenses incurred for an historic structure or property cannot be expensed to the CPF:

Group C (not permissible from CPF)

- Appliances
- Cabinets
- Carpeting
- Computer, telephone or cable lines
- Decks (not part of the original building)
- Demolition costs (removal of a building on property site)
- Enlargement costs (increase in total volume)
- Fencing
- Feasibility studies
- Furniture
- Landscaping
- Moving (building) costs
- Outdoor lighting remote from building
- Parking lot
- Patios
- Paving
- Permit fees or architect, engineering costs for adaptive re-use purposes
- Planters
- Porches and Porticos (not part of original building)
- Retaining walls
- Sidewalks
- Signage

- Storm sewer construction costs
- Walkways
- Window treatments

Group C expenses cannot be expensed to CPF and therefore are not considered in calculating the total project cost. Furthermore, Group C expenses cannot be considered when calculating a CPF match for a grant.

Example: An historical property acquired with CPF cannot be used to house unrelated staff or be used for any purpose other than for which it was acquired consistent with Town Law 64-e. Such historical properties may only be used by a historical society or similar organization or CPF staff. The historic property must be open to the public.

9-a. (c) Expenses related to the customary operation and maintenance of acquired interests or rights in real property shall not be permitted from the fund.

“Customary operation and maintenance of acquired interests or rights in real property” does not include stewardship projects which protect or enhance the natural, scenic, or open space character for which the real property was acquired or projects which provide or sustain public access to the natural, scenic or open space character of the real property. (see 9-a(a)).

Example: stewardship work in furtherance of a wetlands restoration plan is a permissible expense to the CPF

Example: stewardship work based upon a multi-year invasive species removal and abatement plan is a permissible expense to the CPF

Example: “Customary operation and maintenance” includes but is not limited to routine grass mowing not related to a grassland or meadowland restoration plan, utility costs such as electric, heat, water or cable associated with CPF-acquired property, trash removal or the repair of a non-historic structure on CPF-acquired land

Example: The costs of establishing a walking trail including the installation of a foot bridge, is permissible as well as the costs of upkeep of the walking trail and foot bridge.

Example: The removal of debris from acquired land is a permissible cost. The annual or recurring clean-up of the land is not a permissible expense to the CPF.

Example: In order for a natural resource stewardship project to be permissible, it must have a project purpose and duration which is supported by expert opinion.

Example: The installation and upkeep of an access road and parking area to improve and support access on CPF open space pursuant to Section 9 is a permissible expense to the CPF.

9-a. (d) Any project funded pursuant to this subdivision must have a useful life of five years or more under section 11.00 of the local finance law.

Example: The installation of a wood informational kiosk which contains a trail map or other information relative to the open space it is installed upon and which enhances the public's access for passive use thereof, is permissible.

Example: The purchase of a brush cutting mower for the exclusive use of trail work on CPF lands, is permissible provided such equipment has a useful life of at least 5 years.

Example: The construction of a wood walkway which enhances the access to the open space for passive use is permissible.

Example: The construction of a restroom on the open space is not a permitted CPF expense as although it is a public amenity, it does not enhance the actual access to the open space as required by Section 9(c).

Example: The expense of a 4-wheel drive vehicle, truck or other off-road vehicle used exclusively for CPF purposes, is part of a management and stewardship "project" and is a permissible expense as equipment provided it has a useful life of 5 years.

9-a. (e) Any expenditure from the fund for a purpose other than that permitted herein shall be deemed to be prohibited.

Only those expenditures for purposes explicitly cited in the statute are permitted expenditures from CPF.

10. Rights or interests in real property acquired with monies from such fund shall not be sold, leased, exchanged, donated or otherwise

disposed of or used for other than the purposes permitted by this section without the express authority of an act of legislature, which shall provide for the substitution of other lands of equal environmental value and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by legislature. Nothing in this section shall preclude a town, by local law, from establishing additional restrictions to the alienation of lands acquired pursuant to this section. This subdivision shall not apply to the sale of development rights by a town acquired pursuant to this section, where said sale is made by a central bank created by a town, pursuant to a transfer of development rights program established by a town pursuant to section 261-a of this chapter, provided, however (a) that the lands from which said development rights were acquired shall remain preserved in perpetuity by a permanent conservation easement or other instrument that similarly preserves the community character referenced in subdivision four of this section, and (b) the proceeds from such sale shall be deposited in the community preservation fund.

This is the "alienation clause" of CPF which substantially disallows the transfer of rights or interests in real property acquired with CPF monies.

Example: A town may not lease a CPF-acquired property to an individual or entity for public or private purposes as a lease alienates certain rights and creates a possessory interest on the part of the Lessee.

Example: A town may enter into a license agreement with a not-for-profit entity whose mission and purpose have a sufficient connection to the purpose for which the property was acquired, to manage or steward a CPF-acquired property or part of a property, provided the use directly relates to the purpose for which the property was acquired and the property is open and accessible to the public. A license agreement does not create a possessory interest in the rights or interests of real property.

Example: A town may enter into a license agreement with a local historical society permitting the society to manage and steward a historic building acquired with CPF monies, provided the property is open and accessible to the public.

Example: A town may not enter into a license agreement with a television station or library or other public or private entity whose use does

not directly relate to the statutory purpose for which the property was acquired, to use a CPF parcel or occupy a structure located on a CPF-acquired parcel.

Example: A town may enter into a license agreement with an entity to manage a recreational use on CPF land, provided the recreational use was a stated purpose for which the property was acquired and such use is open and available to the public.

Example: A town may enter into a license agreement with an entity or individual to manage an agricultural use on CPF land, provided the agricultural use was a stated purpose for which the property was acquired.

This section excludes the sale of development rights by the Town acquired pursuant to this section from the alienation restrictions. Development rights acquired without fee title can be placed in a central bank and resold with proceeds to be deposited into the CPF. If a Town wishes to bank development rights it has acquired with the fee title of real property, the Town must set forth the number of development rights to be banked in the resolution authorizing acquisition of the real property.

13. The cost of employees and independent contractors to implement the provisions of this section may only be paid for by the fund where the duties and responsibilities of said employees and independent contractors are directly dedicated to implementing the provisions of this section. Where such employees and independent contractors are not exclusively dedicated to implementing the provisions of this section, no more than the cost of the actual time expended directly dedicated to implementing the provisions of this section may be charged. Such costs shall be expressly identified in the town budget and any plan adopted pursuant to this section before funds for such costs may be expended. In addition, such costs must be documented by a time accounting system, subject to audit. Costs relating to the activities of elected officials implementing the purposes of this section may not be a charge to the fund.

Town staff may be paid by the CPF for work performed for CPF. Full time staff hours paid by CPF must be solely dedicated to the CPF program.

Any employee whose work time is not exclusively dedicated to CPF must be identified in the town budget and the Management & Stewardship Plan indicating employee costs chargeable to CPF.

The fringe benefits of Town staff whose annual work time is not exclusively dedicated to CPF, may only be expensed to CPF for that same percentage.

Example: A staff person spends 40% of her time performing CPF work during the calendar year. Up to 40% of her salary and fringe benefits may be expensed to CPF.
