

AMSTERDAM TRAILS MAP

Spring 2014

Trails Mapping

The Department has been working in cooperation with the Information Technology Department to map all the existing trails across town from Wainscott to Montauk. This data was obtained by walking miles of trails with GPS equipment and has taken several months to collect and process. When used in conjunction with the Town's GIS program, the information will be greatly helpful when planning trail reroutes, trail connections and in considering potential land acquisitions.

Previously, there was no single place where all this data could be found for East Hampton's trails. There is more work to be done and the current trail data is being used internally only. Established trails traverse not only Town lands but also lands owned by the State, County, Peconic Land Trust, The Nature Conservancy and others. It is our hope to coordinate with these other owners and eventually create a printed and/or online trail map for public use.
