

## Kirk Park Boardwalk

On Tuesday, September 13, 2016, the Department of Land Acquisition and Management and the East Hampton Trails Preservation Society (EHTPS) worked together to build boardwalks over a section of Paumanok Path through Kirk Park in Montauk. This section of trail runs along the southern edge of Fort Pond and floods often. The newly installed boardwalks will keep hikers' boots above water when the water level is high. The volunteer effort of EHTPS and their donation of building material is greatly appreciated by the Town and local trail users.
